**Teaching plan –November- 2020-21**

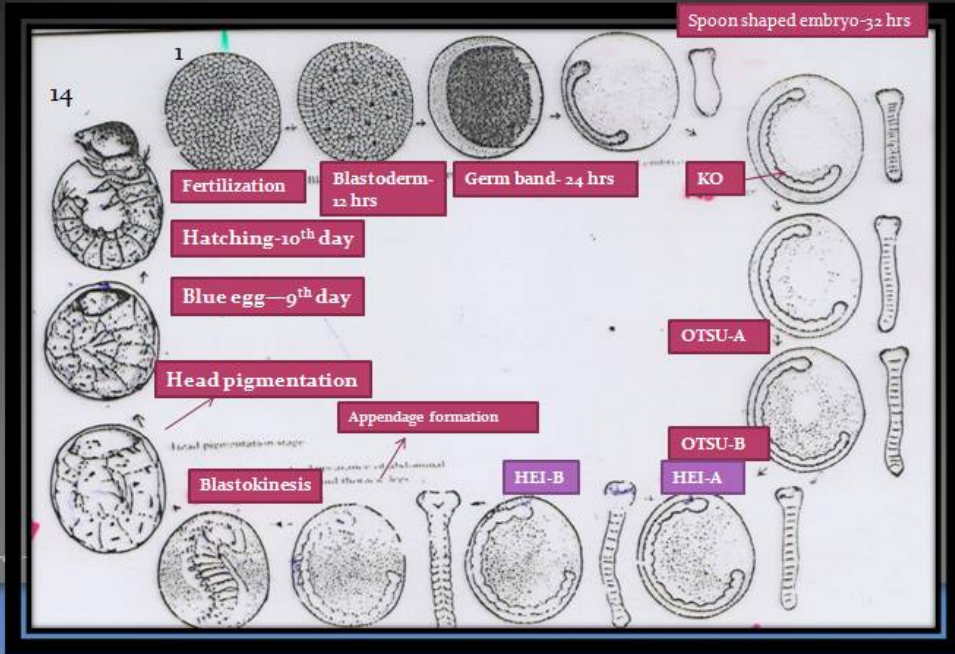

**Name of the Lecturer: S. Smitha**  
**Class: III B.Sc. ZSC**

**Paper: 5**  
**Topic: Developmental Biology**  
**of Bombyx mori.L**

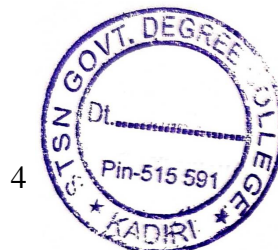

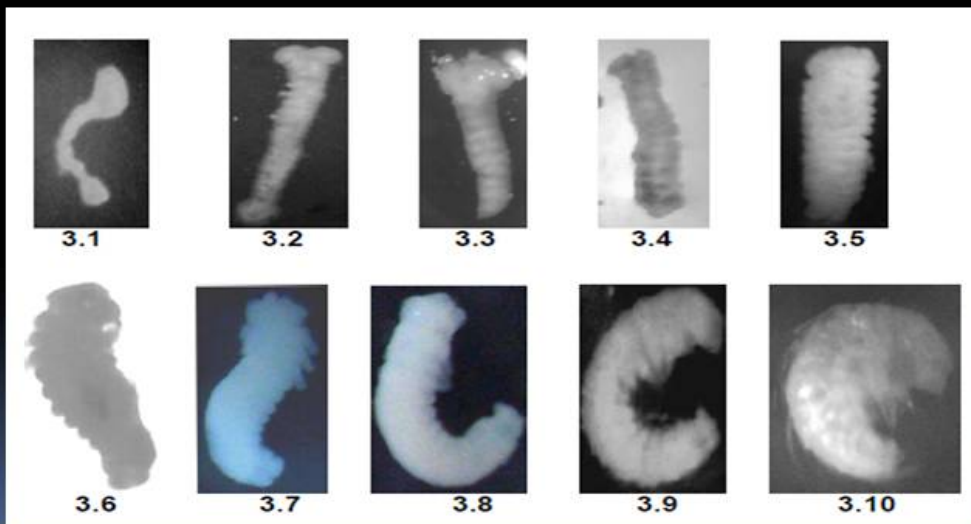

1.	Hours required	8 hrs
2.	Learning objectives:	<ul style="list-style-type: none"> <li>• To understand the basic concept of Fertilization and the transformation of an apparently structure less blob of jelly i.e. Zygote into a new highly complex multi cellular organism.</li> <li>• Embryonic stages of silkworm egg and crucial periods.</li> </ul>
3.	Previous knowledge to be reminded:	<ul style="list-style-type: none"> <li>• What is Ontogeny and phylogenic development?</li> <li>• What is developmental biology?</li> </ul>
4.	Topic synopsis:	<p>Developmental biology deals with the Study of subsequent stages of an embryonic development of an individual .The following steps have been included during the transformation of a unicellular zygote into a multicellular organism.</p> <ul style="list-style-type: none"> <li>• Cell division</li> <li>• Tissue formation and</li> <li>• Organogenesis</li> </ul> <p>In silkworm the fertilization is said to be external and poly spermy is observed by Scientist Kawaguchi in the case of silkworm. The embryonic development starts with the Cleavage of the zygote nucleus into many cleavage nuclei. The eventual development of Blastoderm at the periphery of the inside of the fertilized egg at 12 hrs of oviposition show progressive development and gradually develops Germ band which can be referred as a pro embryo. Germband is demarcated with different visceral layers Viz.,</p> <ul style="list-style-type: none"> <li>• Ectoderm</li> <li>• Mesoderm and</li> <li>• Endoderm.</li> </ul> <p>All the physiological systems take their origin from the invaginations</p>

		<p>of above visceral layers. The key changes during the embryonic development are</p> <ul style="list-style-type: none"> <li>• Segmentation of the body with 18 segments-KO stage.</li> <li>• Elongation of the body and differentiation of Head, Thorax and abdomen-OTSU-A&amp;B and HEI-A &amp; B stages.</li> <li>• Expansion of cephalic and caudal lobes.</li> <li>• Longest embryo formation occupying 75% of the total space of the egg.</li> <li>• Budding of stomodeum. and proctodeum.</li> <li>• Development of appendages of head, thorax and abdomen as rudiments.</li> <li>• Blastokinesis</li> <li>• Head pigmentation stage.</li> <li>• Eye spot and blue egg stage of embryo.</li> <li>• Hatching on 10<sup>th</sup> day after head chitinization.</li> </ul>
5.	Examples and references:	Embryology in human beings, Chick embryology etc..
6.	Additional inputs:	<ul style="list-style-type: none"> <li>• Vitellogenesis</li> <li>• Yolk formation, Micro and mega lecithal types of eggs.</li> </ul>
7.	Teaching models used:	<ul style="list-style-type: none"> <li>• Laminated photographs</li> </ul>
8.	Teaching aids	<ul style="list-style-type: none"> <li>• OHP transparencies.</li> <li>• Internet</li> </ul>
9.	References	<ul style="list-style-type: none"> <li>• Developmental biology by Rastogi.</li> <li>• Silkworm biology Cytogenetics and breeding by Dilip de sarkar</li> </ul>
10.	Student activity planned	<p>Models of different stages of embryology in silkworms</p> <p>Mounting of embryos, fixation and identification under dissection microscope.</p>
11.	Any other	<p>Apart from conducting Co curricular activities such as Seminars, Remedial classes, tests, discussions, A field trip to silkworm seed production centre enable the students to realize the care to be taken during the embryonic development at various stages.</p>

# Embryological stages in Silkworm

## Embryonic stages of the silkworm Bombyx mori from dissected eggs.

**Activities during the Lockdown period by Dr.M. Sankara Rao,**  
**Lecturer in Chemistry**

- Conducted awareness program on **COVID-19** through ZOOM meeting for III B.Sc., students.
- Online class on preparation of **Sanitizer** according to WHO guidelines for III B.Sc., Cluster students.
- Zoom meeting on safety measures of **COVID-19** for I B.Sc., students.
- Revision of syllabus for III B.Sc., Cluster students (Online platform).
- Revision of syllabus for I B.Sc., Cluster students (Online platform).
- SKU, SVU and other Universities PG entrance (Chemistry) classes to the III B.Sc., students.
- 30 % of syllabus completed for III B.Sc.,(BZC) from Paper-V to the 2020-2021 Batch (Online mode only).
- Participated in **6-** Faculty Development Programmes.
- Actively participated in **36-** National Webinars.
- Participated in **10-** International Conferences.
- Participated in **2-** Workshops.
- Active participation in SK University UG examinations.
- Completed online **OC** from Ramanujan College, Delhi University ( from 01 Sept.2020 to 30 Sept. 2020).

Active participation in Online Classes and FDPs and Webinars during the pandemic COVID-19

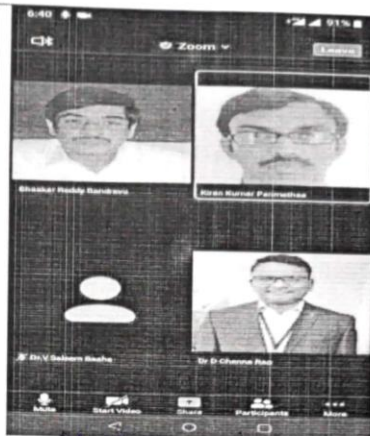

**Lockdown period Activities by B.Bhaskar Reddy, Lecturer in Chemistry**

- Taken 28 online classes for 5<sup>th</sup> Semester students and completed about 80 % of the syllabus allotted to me.
- Taken 10 online classes for 3<sup>rd</sup> Semester students and completed about 35 % of the syllabus allotted to me.
- Four video lessons were uploaded to you tube for I, II & III Year students.
- Provided guidance for PG entrance in Chemistry through online.
- Prepared **H5P** content on COVID-19 general awareness and Chemistry related topics.
- Participated in **15** National Webinars and 5 International Webinars in Chemistry and other fields.
- Participated in **5** day FDP programme in Chemistry organized by **CCE**, Vijayawada from 1-5 July 2020.
- Participated in 5 day FDP in **LMS video and Pedagogy** organized by CCE Office from 3-7 August 2020.
- Selected by CCE office as content generator for the preparation of **LMS on two topics both in English and Telugu media for 5<sup>th</sup> Semester in four Quadrant approach** i.e. Handout, PPT, Video and Self assessment questions. Successfully completed the task and uploaded them to CCE LMS portal.
- One online You tube live streaming class has been taken for 3<sup>rd</sup> Sem students.
