

STSN GOVERNMENT DEGREE COLLEGE

KADIRI - 515591

SRI SATHYA SAI DT.

2.3.1 - Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences.

Field Works:

Nature of the programme: Aquaculture field trip

Class: III BSc,(BZC) Cluster

No of participants: 26

Incharge of the activity: Dr.D.Adinarayana

Objectives:

1. The main objective of conducting a field trip for students is to reinforce experimental and contextual learning. Field trips are a way of enhancing class room learning by making real world connections
2. Fish capture production relies on the use of fresh water ponds which hold and exchange water receive feed and allow for holding, rearing and harvesting of fish

Outcomes:

The students learned the following skills from the fish farming. They are as follows:

1. Management of water quality
2. Feeding process of the fishes
3. Drainage systems in the fish pond
4. Economic importance of the fishery farming.

Report:

Department of zoology went to Aquaculture field trip on 24-06-2022 to fishery pond near Erkalavandlapalli village kadiri mandal and students observed the size of the fish pond i.e, length and wedth of the pond they measured temperature and pH of the water and recorded them. students catches the fishes by using boat.

The students focus on water quality management, feeding process,aeration drainage systems economic impotence of fishery farming.

AQUA CULTURE FIELD TRIP

FRESH WATER FISH POND

AERATION MECHANISM

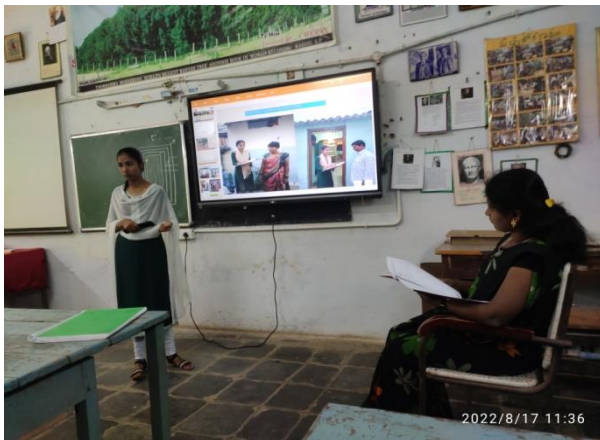

CATCHING OF FISHES BY USING THE BOAT
