Objectives of E-Governance

E-Governance

- e-Governance can be defined as the application of information and communication technology
- (ICT) for providing government services, exchange of information, transactions, integration of previously existing services and information portals.
- The "e" in e-Governance stands for 'electronic' The Council of Europe referred to e-Governance as:
- The use of electronic technologies in three areas of public action:
- relations between the public authorities and civil society the functioning of the public authorities at all stages of the democratic process (electronic democracy)
- the provision of public services (electronic public services)
- Reasons for Opting e-Governance
- Governance per se has become very complex
- Increase in citizens' expectations from the government
- Different Connotations of e-Governance
- **e-Administration:** The use of ICTs to modernize the state; the creation of data repositories for
- Management Information System (MIS) and computerization of records (land, health etc).
- **e-Services:** The emphasis here is to bring the state closer to the citizens.
- For Examples: Provision of online services.
- e-administration and e-services together constitute what is largely termed as e-government.
- **e-Governance:** The use of IT to improve the ability of the government to address the needs of society.
- It includes the publishing of policy and program-related information to

transact with citizens.

- It extends beyond the provision of online services and covers the use of IT for strategic planning and reaching the development goals of the government.
- **e-Democracy:** The use of IT to facilitate the ability of all sections of society to participate in the governance of the state.
- Emphasis is on bringing transparency, accountability, and participation of people.
- It includes online disclosures of policies, online grievance redressal, e-referendums etc.

Origin

- e-Governance originated in India during the 1970s with a focus on in-house government applications in the areas of defence, economic monitoring, planning and deployment of ICT to manage data intensive functions related to elections, census, tax administration etc.

Objectives

- Better service delivery to citizens. Ushering in transparency and accountability.
- Empowering people through information.
- Improve efficiency within Government i.e between centre-state or inter-states.
- Improve interface with business and industry.
- Pillars of e-Governance
 - People
 - Process
 - Technology
 - Resources
- Types of Interaction in e-Governance
 - G2G i.e. Government to Government
 - G2C i.e. Government to Citizen
 - G2B i.e. Government to Business
 - G2E i.e. Government to Employees
